

# **About Sympany**

20 million kilos of textile,
70 municipalities, 1.450 containers,
3 sorting centers

#### Foundation with a mission

Creating a textile chain where raw materials are reused and not lost. For a clean, sustainable world.

# Investing in innovation in textile recycling

- Mechanical recycling (1): Vodde
- Mechanical recycling (2): VRK
- Chemical recycling: SaXcell
- Plastic recycling: Uppact
- Various research projects

# Currently

- Industry in transition
- Low degree of automation, no robotization

### **Future**

- Automatic sorting
- Al-based
- Increase production volume, lower sorting costs

# **Three Obstacles / Policy Gaps**

Focus on recycling in all regulations and mindset

Cost price of sorting

Data on chemical composition of feed stock

# Three Highlights / Positive Regulatory Aspects

Textile as an example for the circulair industry

 Digital Product Pasport with extension on Chain of Custody

 Extended Producers Responsability (EPR) when revised
